

## We are: CHARTERING

From 1<sup>st</sup> January 2023 our CPP fleet will be commercially operated in-house, together with the technical management on Donsö.

This is a strategic decision based on our commitment to be a ship owner with all parts in-house and to get even closer to our customers. This is a step in our vision to always ensure the best possible outcome for our customers, with the least possible impact on the environment.

Our commercial team will consist of members that are well known in the market with previous experience from working at Navix Maritime Chartering.

Our DPP vessels Solero and Solando will continue to be commercially operated by Navix, and the close co-operation between Donsötank and Navix will persist.

We are thankful for these many years of a productive collaboration with Navix, their way of always prioritizing the ship owners has not gone unnoticed. We trust that this will be a seamless transition for our customers as well as employees and are looking forward to this new chapter for Donsötank.

### CPP vessels – Operated by Donsötank

	DWT	CBM
Prospero	22.543	27.800
Pacifico	22.543	27.800
